

Charisma® Naturally reliable.

Easy and uncomplicated restorations up to date.

- » **You feel comfortable with the well-known easy handling and reliability:** Charisma's excellent modeling and polishing properties arise from our long-standing experience in composite technology. Your personal habits for using Charisma remain unchanged, we just improved the filler system.
- » **You benefit from an increased chameleon effect due to the ceramic-reinforced formula:** Our improved Charisma facilitates single-shade layering techniques and makes the shade selection and match more convenient. The ceramic-reinforced formula ensures long-lasting natural results with even more ease of application.

Giving a hand to oral health.

KULZER
MITSUI CHEMICALS GROUP

Charisma®

The naturally reliable all-rounder with increased chameleon effect.

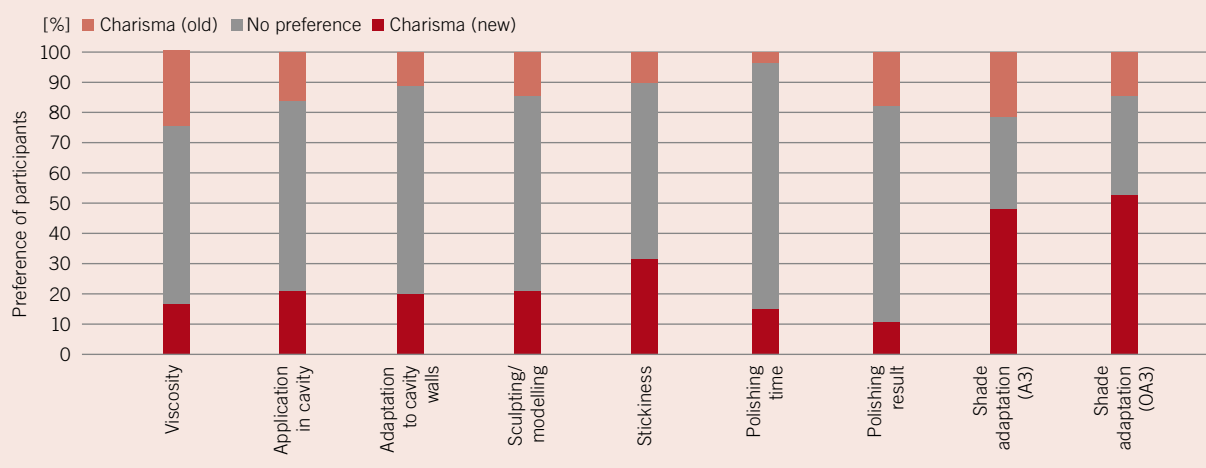

With Charisma, you handle single-shade layering techniques ever so easily

Easy handling and reliability are what you expect from the natural restorations of Charisma. As one of the first universal composites on the dental market when launched in 1992, it has been used every day for over twenty years – in millions of fillings – by practitioners around the world.

Based on our expertise and long-term experience with Charisma, we improved the formula in order to keep this popular universal composite up to date. While your personal habits for using Charisma remain unchanged, the ceramic-reinforced formula ensures long-lasting natural results with even more ease of application.

The updated Charisma performs with the same uncomplicated convenience as always. You, however, will manage natural results with easy single-shade layering techniques even more easily. See for yourself!

Charisma with the ceramic-reinforced formula offers the same well-known handling properties
